SERVICE DEPARTMENT

PDQ RADIO REPAIR PROCESS

- 1) Fill out ONE repair form per radio.
- 2) Once your radio(s) are received by our warehouse, we will send you confirmation by way of your preferred communication method.
- 3) Our goal is to repair your radios within 10 days of receiving them.
- 4) You will receive a tracking # from the shipping carrier when your radio(s) leave our facility on their way back to you.

We ship using the same speed at which you sent them to us. For example, if you shipped using UPS Ground, we will return them Ground, if you shipped using Next Day Air, we return your package Next Day Air. Warranty repairs for radios purchased from 49er Communications within the warranty period are handled free of charge, ground shipping included, expedited available upon request, fees apply.

PACKING & SHIPPING INSTRUCTIONS

- 1) Use a corrugated box. Use a box big enough to allow for an adequate amount of packing material to protect all sides of the unit. If using a box that has been used before, remove all existing shipping labels.
- 2) Wrap each unit separately with packing material. If you are placing more than one unit in one box, each item should be wrapped well, and then additional packing material should go between units. Allow approximately 2-4 inches of packing material between the units and all sides of the box. Examples of packing materials are; foam peanuts, bubble wrap, newsprint, etc.
- 3) Include repair form. Before sealing the box, make sure to put a copy of the repair form in the box, preferably rubber banded to the unit to be repaired (keep a copy of the repair form for your records as well).
- 4) Close box securely. Make sure the box is sealed tightly with plastic packing tape.
- 5) Ship via an insured method to: 49er Communications, 361 Railroad Ave., Nevada City, CA 95959.
